

# PERE BELLÈS GEOMETRICS

Man's footprint on the ground is geometrically shaped. Fields, cities, buildings, communications take geometry as a foundation. Pere Bellès conceptualizes the territory. It is based on the plots that architects and urban planners have drawn up on a map to define their space for action. Lately, his walking or running journeys have been incorporated into his geometric thinking. His work, he says, "is based on the search for traces left by man on the territory where he has lived throughout history.»

Pere Bellès is the author of M1 IFT LLD (Mural1 InFrastrucTures LLeIDa), a public art project for the city of Lleida on the walls of the Fundació Vallpalou, on Avinguda Tortosa.
